

For Immediate Release

Marmin Technologies Unveils Free E-Invoicing Readiness Checklist for Malaysian Businesses

**An Effective Tool to Empower Businesses of All Sizes,
Simplify Compliance and Streamline Operations**

Kuala Lumpur, 28 October 2024 – Marmin Technologies, a leading e-invoicing platform trusted by businesses, has launched a free *E-Invoicing Readiness Checklist* to assist Malaysian businesses in assessing their preparedness for the upcoming mandatory e-invoicing regulations.

With compliance deadlines looming over 1.5 million companies and 9.1 million businesses in Malaysia¹ that need e-invoice solutions, this tool offers businesses a practical approach that enables them to understand where they stand, meet compliance requirements and improve overall functionality.

“This checklist is designed to help business managers overcome the complexities of e-invoicing and regulatory compliance,” said Murtuza Furniturewala, COO of Marmin Technologies. “It offers a structured self-evaluation process, allowing companies to understand their current state and implement scalable solutions to simplify business processes. By addressing these challenges early, businesses can focus on growth while achieving compliance and streamlining their operations.”

Murtuza pointed out that e-invoicing regulations demand more detailed information than standard ERP or accounting systems provide. As e-invoicing evolves, businesses must adapt to frequent regulatory changes. Also, integrating e-invoicing with existing systems is complex and resource-intensive. Careful planning and management are essential to ensure seamless compliance and avoid operational disruptions.

“Our goal is to provide businesses with the tools they need to enhance financial operations and reduce costs through efficient e-invoicing solutions,” said Murtuza, a trusted expert in driving large-scale operational efficiency and process optimisation.

With Marmin’s PEPPOL-certified platform and the support of our experienced compliance experts, businesses can overcome operational challenges and thrive in Malaysia’s digital transformation.

Businesses can download the checklist at https://hubs.ly/Q02T_05h0 or schedule a 30-minute free consultation at marmin.ai/malaysia/ with a Marmin expert to explore tailored solutions for their invoicing needs.
